

PROVIDE YOUR DEALERS WITH A
MORE EFFICIENT
LOAN FUNDING PROCESS.

CUDL SmartFund ■

The CUDL SmartFund program enables your credit union to provide your participating dealers with a more efficient loan funding process. CUDL SmartFund's unique technology instantly allows dealers to electronically transmit or upload imaged copies of all loan documentation to your credit union — providing faster funding of your members' vehicle loan packages.

With CUDL SmartFund, your credit union can easily retrieve documents faxed by the dealer, store them electronically in the CUDL system, plus fax or upload any internal documents related to an application and loan package. This enables your credit union to expedite the processing of loan packages, ultimately providing faster funding to dealers.

Here are some fast facts on how CUDL SmartFund benefits your credit union.

■ **Reduce processing time.**

Dealers can fax contracts and other subsidiary documents to your credit union. Faxes are converted to images (PDFs) on the CUDL system for easy retrieval.

■ **Improves loan underwriting and risk management.**

All documents for each loan package are organized and stored together, making retrieval and package processing a faster and easier task.

■ **Simplifies the loan process.**

When alerted to missing documents, dealers can locate and fax them quickly, minimizing any funding delays.

CUDL SmartFund provides faster funding of your members' auto loan packages while drastically reducing your processing time and minimizing the need for courier service.
